Author/Title Index

Allen, W. F., Ramarao, B. V. and Weiland, R. H. Continuous sedimentation of model suspensions promoted by rigid buoyant particles, 55
Ariman, T. *See* Tousi, S., 66
Attia, Y. A. *See* Bavarian, F., 46

Barker, R. E., Brunson, R. R., Clinton, S. D. and Watson, J. S. Granular electrofiltration, 166
Barnett, S. M. *See* Misra, T. K., 267
Bavarian, F., Fan, L.-S., Elzeky, M. and Attia, Y. A. Treatment of high-sulfur coal using selective flocculation and microbial desulfurization in a draft-tube slurry bubble column, 46
Beizaie, M. Simulation of particle collection by model fiber filters, 132
Berglund, K. A. and deJong, E. J. The calculation of growth and nucleation kinetics from MSMPR crystallizer data including growth rate dispersion, 38
Bhandarkar, M. *See* Ma, Y. H., 90
Brunson, R. R. *See* Barker, R. E., 166

Ceresi, J. E., Jr. and Tien, C. Carbon adsorption of phenol from aqueous solutions in the presence of other adsorbates, 273
Chang, J-S. *See* Vigneswaran, S., 259
Chatterjee, S. G. and Tien, C. Adsorption in continuous-flow well-mixed tanks—the effect of residence time distribution of adsorbents, 79
Chen, Y.-M., Huang, Y. W. and Fan, L. T. An approximation formula for evaluating the number of possible schemes for 1FmP separation problems, 222
Choo, C.-u. and Tien, C. Hydrosol deposition in fibrous beds, 122
Clinton, S. D. *See* Barker, R. E., 166
Costa, C. *See* Ramalho, E., 99

deJong, E. J. *See* Berglund, K. A., 38

Elzeky, M. *See* Bavarian, F., 46

Fan, L.-S. *See* Bavarian, F., 46
Fan, L. T. *See* Chen, Y.-M., 222
Findley, M. E. *See* Shu, C. M., 18

Gidaspow, D. *See* Jayaswal, U. K., 3
Gimbel, R. *See* Mulder, T., 153
Grevillot, G. *See* Ramalho, E., 99
Gu, T., Tsai, G.-J. and Tsao, G. T. Simulation of multicomponent elution with the mobile phase containing competing modifiers, 184

Haslbeck, J. L. *See* Ma, W. T., 195
Henry, F. S. *See* Tousi, S., 66
Huang, Y. W. *See* Chen, Y.-M., 222

Jayaswal, U. K., Gidaspow, D. and Wasan, D. T. Continuous separation of fine particles in nonaqueous media in a lamella electrosettler, 3
Ju, S., Weber, M. E. and Mujumdar, A. S. Electroosmotic dewatering of bentonite suspensions, 214

Kulvaranon, S. *See* Shu, C. M., 18
Kydros, C. A. *See* Matis, K. A., 255

Liapis, A. I. *See* Shu, C. M., 18
Lokhandwala, K. A. and Stern, S. A. A membrane process for separating CO_2 from diving atmospheres, 29

Ma, W. T., Haslbeck, J. L., Neal, L. G. and Yeh, J. T. Life cycle test of the NOXSO SO_2 and NO_x flue gas treatment process: Process modeling, 195
Ma, Y. H., Sun, W., Bhandarkar, M., Wang, J. and Miller, G. W. Adsorption and diffusion of nitrogen, oxygen, argon, and methane in molecular sieve carbon at elevated pressures, 90
Manandhar, U. K. and Vigneswaran, S. Effect of media size gradation and varying influent concentration in deep-bed filtration: Mathematical models and experiments, 178
Matis, K. A., Mavros, P. and Kydros, C. A. A dissolved-air flotation microcell for floatability tests with particulate systems, 255
Mavros, P. *See* Matis, K. A., 255
Miller, G. W. *See* Ma, Y. H., 90
Misra, T. K. and Barnett, S. M. Electrokinetic measurements of particles in lubricating oils: Implications for filtrations, 267
Mujumdar, A. S. *See* Ju, S., 214
Mulder, T. and Gimbel, R. Application of permeable collectors in deep-bed filtration, 153

Neal, L. G. *See* Ma, W. T., 195
Ng, K. M. Systematic separation of a multicomponent mixture of solids based on selective crystallization and dissolution, 108

Ramalho, E., Costa, C., Rodrigues, A. and Grevillot, G. Adsorptive parametric pumping for the purification of phenolic effluents, 99
Ramarao, B. V. *See* Allen, W. F., 55
Rice, P. A. *See* Tackie, M. N., 205
Rincon, J. Aerosol collection in magnetically stabilized fluidized filters, 245
Rodrigues, A. *See* Ramalho, E., 99

Sakoda, A. and Suzuki, M. The effects of chilled air feed on oxygen-enrichment pressure swing adsorption by simplified computer simulation, 73
Shan, S. *See* Yao, C., 282
Shu, C. M., Kulvaranon, S., Findley, M. E. and Liapis, A. I. Experimental and computational studies on propane-propylene separation by adsorption and variable-temperature stepwise desorption, 18
Stern, S. A. *See* Lokhandwala, K. A., 29
Sun, W. *See* Ma, Y. H., 90
Suzuki, M. *See* Sakoda, A., 73
